

# The Ecological Community

Announcing a multi-disciplinary design competition open to all currently enrolled students at any college or university in the U.S.A, Canada or Mexico.

The focus of the competition is to go beyond yesterday's concerns between, centralized cities and suburbs and between automobiles and transit, all in order to focus on the precedent - setting dynamics of the digital revolution and humanity's first-ever global civilization.

For more information and registration go to  
[www.twoworldsfoundation.org](http://www.twoworldsfoundation.org)
